

DAILY RECORD-UNION

WEDNESDAY, AUGUST 8, 1888

The RECORD-UNION is the only paper on the coast, outside of San Francisco, that receives the full Associated Press dispatches from all parts of the world. Outside of San Francisco, it has no competition, in point of news, in its home and general circulation throughout the coast.

The demand for cheaper coats seems to me necessarily to involve a cheaper man and woman under the coat."—*Benjamin Harrison.*

"Grover Cleveland has done more to advance the cause of free trade than any Prime Minister of England has ever done."—*London Spectator.*

"The only benefit England ever receives from Irishmen is when they emigrate to America and vote for free trade."—*London Times.*

The London "Times," having a letter from President Cleveland in its possession, after quoting passages from it, editorially says: "It would hardly be possible to put the free trade case more clearly or more strongly. The arguments which Cleveland uses are those which Cobden used to employ forty-five years ago, and which any English free-trader would employ now. They are purely free-trade arguments, and as such we are glad to see Cleveland using them, though sorry for the popular infatuation which makes it dangerous to give them their right name."

GIVE US A REST.

We had occasion recently to call attention to certain obstructing side-issues relating to the nomination of men for Cabinet and diplomatic positions. Our remarks had the desired effect. Not a single appointment to General Harrison's Cabinet, or to a foreign mission, has been made since the appearance of that editorial. If the gentlemen who hold the destinies of the Republican party in the hollow of their hands have further political emoluments to bestow, they have profited by our counsel and are keeping their own and General Harrison's confidences.

We find it necessary, however, to admonish Mr. De Young, the general manager of the Republican party west of the Rocky Mountains, in regard to giving prominence to the abrogation of the Hawaiian treaty. No good can come to the Republican party in the Pacific States by raising that issue. The treaty is popular; it fostered a very important Pacific coast industry; it protected the people against the sugar ring, of which Mr. De Young is the well-known attorney; it opened commercial relations between the State of California and the Hawaiian Islands highly advantageous to the former, and no good can result from emphasizing the relation between General Manager De Young and the sugar trusts of the East.

A few years ago, and by a conversion more sudden than that of St. Paul, Mr. De Young became afflicted with anti-republican-phobia. Event succeeded event in a thrice sequence, until the celebrated attempt to assassinate Mr. De Young by a sugar prince led pleasing variety to the vernal equinox. The sugar prince was tried for the attempt and was acquitted for reasons which are well understood by all students of political science who have observed the interdependence of a boss system in politics with the system of an elective judiciary. Since that event, however, Mr. De Young has left no stone unturned to secure the abrogation of the obnoxious treaty. With the double motive of reward and revenge, the abrogation of this treaty has become the controlling project of his existence. Every candidate for Congressional position for at least the two past campaigns has immediately after his nomination, received a letter from Mr. De Young, asking him what his position would be, if elected, upon the question of abrogating the treaty. All candidates who have pledged themselves in favor of abrogation received the support of the Chronicle. Those who have asserted their independence, and refused to be bullied into submission have received the unequalled opposition of that paper. It is to this sole cause that the opposition of the Chronicle to Congressman Morrow is attributable. Congressman Morrow declined to pledge himself to a course of opposition. Mr. De Young's opposition to the treaty far outweighed his fealty to the Republican party. He preferred a Democrat whose influence would be arrayed on the side of abrogation to a Republican who favored the treaty, and that prejudice dominates his mind to-day as much as in the past. He has, however, assumed new duties and responsibilities. He sustains a new relation to the Republican party. Within the ranks of that party the premium upon party fealty has long since been withdrawn. It is the recent kicker who is in the line of promotion, and the harder the kick the more certain and the higher the promotion. Already it is being whispered about that the election of Senator Harrison means the abrogation of the Hawaiian treaty. The present high official relation of Mr. De Young with the Republican organization, his well-known astuteness, his continuity of purpose, his high executive qualifications, his well-known identity with and advocacy of the sugar trusts, gives color of probability to the rumors that he has some private assurances from Senator Harrison in the direction of abrogation. We take the liberty of denying emphatically, however, that this is the case. California will cast her electoral vote for Senator Harrison, and when President he will not be unmindful of the wishes of her people. We greatly misunderstand the party and its candidate if either is friendly to the monopoly called the sugar trust of America.

THE CULLION RESOLUTION.

Senator Cullion has introduced a resolution instructing the Committee on Interstate Commerce to take into consideration the competition with American railways of the Canadian Pacific Railway line.

Commenting on this resolution, the San Francisco Chronicle, always hypocritical and never fair, says:

"It is tiresome to make regulations for the government of our own interstate commerce and then have them nullified by the railroad companies making a bargain with Canadian railways to the law of the land."

Now, it is the American railways that have induced Senator Cullion to introduce

the resolution. The American railways have complained of the competition which the Canadian road affords. The Canadian Pacific built from San Francisco to St. Paul. It carries a longer distance for a less rate. It can fix the rate, and force the American railways to carry the goods—that is, it can make a rate so low that shippers will pay no more, and by men-

acing the rate force the American railways to a low figure. Senator Cullion's resolution looks to the elimination of this competition of the Canadian railway, and it has no reference whatever to any combination between that road and the American roads. No such combination has ever existed or can exist. The effect of the competition offered by the Canadian Pacific Railway was to force a low rate of either fares or freights carried a long distance, the railroads could raise their terminal rates, but the Canadian Pacific, carrying freight on foreign territory, and touching the United States at the extreme point, could make a low through rate, being uncontrolled by law, which through rate would have no reference whatever to the intermediate rates. Everybody intelligent upon the subject knows that the interstate commerce law, the American railways cannot do this—that is, if they make a low through rate, or a low rate for a long haul, it affects their intermediate rates, since they cannot make a lower rate for a longer distance than for a shorter.

So, when the Chronicle, in discussing a matter of common public interest, intimates that the interstate commerce law is nullified by the railroad companies making a bargain with Canadian railways, it proves one of two things: either that it is not itself intelligent upon the subject, or that it has been procured to make a representation which would give Senator Cullion's resolution an anti-railroad color.

"Anything to beat Harrison" appears to be the motto of one class of the Democratic press, for it keeps up the iteration that he is opposed to restriction of Chinese immigration. It is enough to know that he stands upon a platform pledged against unrestricted immigration of Chinese, and that General Harrison when in the United States Senate reported and voted for the Fair-Morrow restriction bill, the most satisfactory restrictive bill ever introduced, and which Mr. Belmont killed in the House by pocketing it in behalf of the Committee on Foreign Relations.

PRESS EXPRESSIONS.

Not one day for the Gettysburg celebration, but five days for blue-fishing. Of such is the edicts of Grover—*Philadelphia Press.*

I except the London Times, the Canadian press is giving Cleveland the warmest support he is getting—*Buffalo N. Y. News.*

We venture to assert that England will reap the largest share of any advantages that may arise from the abrogation of the ideas now advocated by the free trade party in the United States—*British History Review.*

The latest that "have come out of Cleveland" are the bluffs. The most prominent codfish of Canada would "come out" for Cleveland's chance—*Inter-Ocean.*

In a contest between Warren Miller and David B. Hill for the gubernatorial chair of the great State of New York, the mass of thinking, independent voters will array themselves on the side of the younger Miller, and this will tend to strengthen the chance of Benjamin Harrison—*New York Epoch (Ind.).*

"Clean cheap cheap men." These are General Harrison's words. Quite egotistical, aren't they? But what sort of men does clean whisky make?—*Indianapolis Sentinel.*

It usually makes cheap Democrats, esteemed contemporary—say, about the \$2 a day—*Indianapolis Journal.*

There are three classes which unite in the cry of free whiskey—the babbling fools, who think they can arouse a prejudice against people who are the lawless, who know the truth, but conceal it; the dishonest and cowardly free-traders, who desire to retain the free-trade revenue taxes in order to cut down the custom duties on imported articles, and have not the courage of their real convictions—*Indianapolis Journal.*

If your conscience drives you to the Republican party on account of the internal revenue plank, how can you go into the third party, which demands the complete and immediate abolition of that whole system? If you can do this, you are a hypocrite, and your tender point of conscience is not temperance, but the tariff. If you join the Democratic party you declare your opposition to temperance legislation and set an example of ludicrous inconsistency—*N. Y. Independent.*

SAN FRANCISCO AND VICINITY.

John McNally, convicted of murder, has become violently insane. His mother lately pronounced symptoms of insanity.

The boiler-makers of the Edison Iron Works, who have been out on a strike for some days past, have returned to work in a body.

The United States Attorney-General has advised Marshal Frank that the maximum pay of Federal Supervisors for the November election in this district has been limited to five days.

A French laborer, aged twenty-six years, named Pierre Leubeque Bousquet, who came to this city two weeks ago from the fields of Los Angeles county, jumped into the bay and was drowned.

A box containing \$100 in gold, \$30 in Mexican money and some railway tickets, was stolen from John Leake, proprietor of a restaurant at No. 420 Pine street, at 6 o'clock on Monday morning.

A telegram from Lakotah says: W. H. Kinnors, the Oakland music teacher who left the city by the bay so unceremoniously last week, is dead. He had been here for so far as any one can discover.

Lieutenant Frank Cushing has presented to the Academy of Sciences a collection of curious insects which he has collected at Los Muertos. They are between thirteen and fourteen centuries old, and consist of stone carvings, and some of the insects, some of which are of different sizes, some of which are of different shapes.

A WARNING.

The modes of death's approach are various, and statistics show conclusively that more persons die from diseases of the throat and lungs than any other. It is probable that, everyone, without exception, receives vast numbers of tubercle germs into the system, and where these germs fall upon suitable soil they start into life and develop, at first slowly, and is shown by a slight cough, and then by a hoarse voice, and if allowed to continue, they extend to the lungs, producing consumption, and to the head, causing catarrh. Now all this is dangerous, and allowed to proceed will in time cause death. At the onset you must act with promptness, and when this is dangerous, and allowed to proceed will in time cause death. At the onset you must act with promptness, and when this is dangerous, and allowed to proceed will in time cause death.

The following amounts were paid into the State Treasury yesterday: Harbor Commissioners, \$25,304.80; Captain Young, State Printer, for the sale of refuse paper, \$87.80; Yosemite Valley Commissioners, \$900.33.

It grieves me to look back over a wasted life, said a comparatively young doctor to a Chicago girl. "To think that with fame and fortune in my reach I have turned from them in order to pursue an humble career," she suggested. "And to realize too forcibly that it is too late to begin again," she suggested. "And to realize too forcibly that it is too late to begin again," she suggested.

"Can you not make one great final effort?" "No; I am too old and too weak to play baseball," she said. "Yes," he said. "You are too old and too weak to play baseball," she said.

Now, it is the American railways that have induced Senator Cullion to introduce

RECEPTION TO REV. DR. MORGAN.

Juvenile Individuality—An Interesting Lecture and a Cordial Greeting.

At the First Baptist Church, last evening, Rev. J. T. Morgan, D. D., President of the Rhode Island Normal College, was tendered a cordial reception, under the auspices of the Baptist Social Union.

At Mr. Morgan's lecture, which was held in the hall of the Rhode Island Normal College, the attendance was good. W. R. Strong, president, Dr. Morgan spoke for about an hour upon educational topics, and in a strain of deep earnestness. His lecture greatly impressed his hearers, and their verdict was one of hearty concurrence in his views. These were very broad, extremely liberal, and yet advocated policies intended to secure the best discipline and training of the best intellectual development and highest moral culture they cannot attempt to present a synopsis of the lecture, which was held in the hall of the Rhode Island Normal College.

Dr. Morgan's lecture was held in the hall of the Rhode Island Normal College, and was attended by a large number of students and faculty. The lecture was held in the hall of the Rhode Island Normal College, and was attended by a large number of students and faculty.
